Research Seminar

Preventing cervical cancer through HPV vaccination targeting adolescents in Mozambique

with

Dr. Khátia Munguambe
Manhiça Research Center (CISM), and
Eduardo Mondlane University, Mozambique

Date: Tuesday, 26 September, 10:00 – 12:00pm

Place: Uppsala University, Dept. of Women's and Children's Health, Uppsala
University, Drottninggatan 4, 4th floor, Globalen Room

Dr. Khátia Munguambe is an Associate Senior Researcher at the Manhiça Research Center (CISM) and serves as Social and Behavioral Sciences Lead for CHAMPS. She is also a lecturer based in the Community Health Department within the Faculty of Medicine of the Eduardo Mondlane University. She holds an undergraduate degree in Biological Sciences, a Master's degree in Control of Infectious Diseases, and a Ph.D in Environmental Health. Dr. Munguambe began her career as research assistant in the Professional Training Centre for Water and Sanitation, National Directorate for Water in Mozambique. Her work consisted of designing and adapting participatory appraisal methodology to document community profiles of hygiene, water and sanitation conditions and practices, as well as developing and implementing community engagement strategies to maximize the demand and uptake of safe hygiene and sanitation practices. Dr. Munguambe coordinates teaching modules on Fundamentals of Community Health as well as Research Methodology for Public Health, both at the undergraduate and post-graduate level.
